

SMD Final Assignment — Flutter Advanced Application

Theme: Smart Travel Companion

Build a feature-rich Flutter application integrating APIs, animations, state management, and clean architecture.

Core Features:

1. Home Screen:

- Fetch places from API
- Display image, title, favorite icon
- Pull-to-refresh, search with debounce, filters
- Use AnimatedContainer, AnimatedOpacity, AnimatedList

2. Detail Screen:

- Hero animation for image
- Weather API integration
- Expandable description using AnimatedSize
- AnimatedSwitcher for loading states

3. State Management:

- Use Riverpod / Bloc / Provider (structured)

4. Navigation:

- Named routes or GoRouter
- Pass complex objects

5. Offline Support:

- Cache API data locally

6. Error Handling:

- Retry UI, empty states

APIs:

- <https://jsonplaceholder.typicode.com/photos>
- <https://api.open-meteo.com/v1/forecast>

Bonus:

- Dark mode
- Maps integration
- Notifications
- Pagination

Submission:

- GitHub repo
- README + demo video
- APK

Evaluation:

- Architecture: 25%
- API + Errors: 20%
- Animations: 20%
- UI/UX: 15%
- Offline: 10%
- Code Quality: 10%
